

## Quality & Environmental Policy Statement

REGALTAGs has developed and implemented a Management System (MS) to ensure that the products supplied and the services offered meet customers and statutory requirements for both quality and the protection of the environment and the prevention of pollution.

This Policy, Manual, Procedures and Work Instructions have been developed to satisfy the requirements of ISO 9001:2015 and ISO 14001:2015.

The Company continually seeks to minimise waste, promote recycling, reduce energy consumption, reduce harmful emissions and, where possible, to work with suppliers who themselves have sound environmental policies.

The Company aims to not only maintain standards, but has adopted a policy of achieving continual improvement through a Plan-Do-Check-Act model by monitoring internal processes, monitoring customer perceptions and promoting the use of the process approach and risk-based thinking.

Regal Tags ensures that all its activities are carried out in conformance with the relevant environmental legislation, as detailed in the Register of Environmental Aspects and the relevant chapters of the Environmental Protection Act 1990, and observes any other local Council requirements, or other compliance obligations.

The implementation and development of the System within the Company has our commitment and support, and the commitment and support of management and staff. All related activities are carried out by suitably experienced/trained personnel.

The management will ensure that relevant procedures and work instructions are communicated to, understood and adhered to by all personnel.

To ensure the effectiveness of the system, internal audits are performed on a planned basis and the overall system including the policy is monitored at Management Review meetings by senior members of staff for its continuing suitability.

Both Quality and Environmental Objectives are set at Management Review and reviewed at subsequent meetings. The objectives and targets together with this Policy are publicised throughout the company and all staff are expected to have read, understood and be committed to their achievement.

The Quality & Environmental Manager has the authority and responsibility for the implementation and maintenance of the Management System.

This Policy is available to the public on request.
